

## **Bellevue WA - Planning**

During 2007, the city developed a policy and planning framework that would address Bellevue's long-range capital and operating budget needs. 2008 Budget discussions used this twenty-year framework for anticipating and addressing needs for the next biennial. It was helpful in receiving direction from Council for the 2009-2010 budget process.

Performance Measures are tied to Desired Program Outcomes and are featured in our biennial budget. All requests for new budget resources must not only be accompanied by suggested ways of evaluating the program (performance) but must show stakeholder demands.
